

# 25 YEARS WARRANTY

**FOR ALUMERO PV MOUNTING SYSTEMS.  
ALUMERO SYSTEMATIC SOLUTIONS GMBH GUARANTEES YOU  
25 YEARS OF PERFECT FUNCTIONALITY AND FREEDOM FROM  
MATERIAL DEFECTS OF THE PRODUCTS SUPPLIED BY ALUMERO.**

The warranty service only includes subsequent delivery of defective parts if damage is reported within the warranty period. Any possible statutory warranty and liability claims are not affected. The warranty is void in the event of damage caused by incorrect assembly, unsuitable or unstabilized substrates including corresponding upstream constructions, the effects of storms and unusual chemical and biological processes. It does not apply in these cases if the damage can be proven to have been caused by significant material or construction defects. If damage is covered by natural hazard insurance, or can usually be covered by it, there are also no claims. The generally recognized rules of architecture, the assembly instructions provided by us and, to the extent appropriate, separate planning documents and statics apply to the assembly work.

We guarantee that all aluminium components and profiles of the ALUMERO PV mounting systems will maintain their load-bearing capacity and functionality within the warranty period, provided that all of the previously mentioned boundary conditions are met. Stainless steel products, products made of galvanized steel and plastic products are not taken into account and are not included in the warranty. If shorter service lives are expressly stated for special components or for a particular type of use, the warranty period is limited to this period. This warranty only affects claims of our contractual partners through whom warranty cases are to be processed. Direct settlement with third parties is only possible with our consent. Our current general terms and conditions always apply.

**SUSTAINABLE
